

Logistics, Warehouse, and Distribution

The Manufacturing Skill Standards Council (MSSC) Certified Logistics Associate-Certified Logistics Technician (CLA/CLT) covers core competency areas defined by MSSC's skills standards for higher skilled, front-line material handling workers in factories, warehouses, distribution centers and transporters. The CLA is a prerequisite for CLT. Individuals are assessed for two credentials and students who achieve both certifications may be eligible to apply for 3 hours of college credit toward the Associate of Applied Sciences degree in Logistics.

Each course delivered through the program corresponds to a major competency area. The MSSC CLA/CLT Training Program consists of two online MSSC courses, with classroom facilitation by an MSSC-certified Instructor. Successful completion of the CLA/CLT Training Program will be as indicated by documentation that the participant passed the MSSC Certified Logistics Associate Online Assessment and the MSSC Certified Logistics Technician Online Assessment.
