

Coming Soon: New Campus, Exciting New Opportunities

Lee

College is expanding! Set to open in the fall of 2027, the new Lee College - Mont Belvieu Campus will bring access to higher education and career training closer to home for students in the rapidly growing Mont Belvieu area.

Currently under construction at the corner of FM 1409 and Gill Parkway, the new two-story, 60,000-square-foot campus will be equipped to serve approximately 1,000 students and will feature modern classrooms, lecture halls and comprehensive student support services.

Students will have access to new Allied Health programs, including respiratory therapy, sonography and sterile processing, as well as core curriculum courses and workforce-focused programs in cybersecurity and cloud computing.

This new campus marks an exciting new chapter for Lee College, bringing affordable, high-quality education closer to more students in our service area while helping meet the evolving workforce needs of our region.
