[Explore CatalogSearch Courses](#)

The Computer and Graphics Technology program is used by a wide variety of organizations to process, design, manage, and communicate information.

Computer graphic design combines skills in technology, business, and art, using computer-generated images and words to create unique concepts and messages for publishing and advertising.

## **What Will I Learn?**

The Lee College Computer and Graphics Technology program prepares individuals to provide technical assistance, support and advice to computer users to help troubleshoot software and hardware problems. Students will gain knowledge in computer concepts, webpage design, information systems, networking, operating systems, computer hardware, the Internet, software applications, help desk concepts and problem solving, and principles of customer service.

## **What Can I Do with This Course of Study?**

- Graphic Designer
