Supplemental Instruction

Supplemental Instruction (SI) is a free academic support program designed for courses that students often find challenging. Each SI supported course is paired with an **SI Coach**, a trained peer who attends class, understands the course expectations, and leads interactive study sessions called **SI Sessions** in which students will build the knowledge from what they learned in class, practice key concepts and problems, and learn alongside their classmates.

SI Coaches also offer tutoring and one-on-one support outside of class.

Benefits of Supplemental Instruction (SI):

- **Enhanced Academic Performance:** Students who regularly attend SI sessions tend to earn higher average final course grades than students who do not attend.
- **Increased Retention Rates:** Supports students in persisting through challenging courses.
- **Peer Collaboration:** Encourages teamwork and shared learning experiences.
- **Critical Thinking Development:** Promotes higher-order thinking skills through discussion and problem-solving.
- **Accessible Support:** Provides additional resources and tutoring for students needing extra support.
